### **Description of Presentation**

Title of Presentation: “Better Living Through Pharmacology”  
An overview of ACLS Medications

Description of Presentation: During a cardiac arrest your assignment is to deliver the medications. Do you start with Epinephrine or Vasopressin and why? Do you follow that with Lidocaine or Amiodarone? What drug is next? We will take a look at the primary meds needed in specific resuscitation scenarios. We will discuss what drugs to administer, discuss specific reasons why and go over drug dosing and calculations.

Objectives:

- 1) The participant will be able to list the appropriate drugs required in specific situations.
- 2) The participant will be able to understand the actions behind the medications delivered.
- 3) The participant will be able to calculate and deliver appropriate drug doses.

Target audience: ALS

Time requirement: 1 to 2 hours

Presented at Prior Conference : Yes

Teaching Method: Lecture
