Description of Presentation

Title of Presentation: Big Help For Little Lives: Assessing and Treating Pediatric Emergencies
Description of Presentation: One of the most frightening calls we respond to is an unresponsive pediatric patient. How do we keep our emotions in check while providing appropriate care for a sick or injured patient? We may not be able to eliminate the feeling of anxiety while talking care of a pediatric patient, however we can substantially reduce our own fears through ongoing education of pediatrics. This class will cover pediatric assessment and care through actual cases to identify signs and symptoms of specific problems.

Objectives: 1) The participant will be able to recognize ominous signs when assessing a critically ill child.
2) The participant will be able to develop an effective treatment plan.
3) The participant will be able to understand the significance of treating the patient quickly and effectively.

Target audience: ALS / BLS
Time requirement: 4 - 8 hours
Presented at Prior Conference : Yes
Teaching Method: Lecture / discussion
