### **Description of Presentation**

Title of Presentation: Respiratory Emergencies in The Pediatric Patient  
Description of Presentation: Children often present with respiratory problems that range from mild to life threatening. Using case presentations we will examine different types of problems, how to differentiate each problem by patient presentation and finally develop a treatment plan to allow for the best outcome.

Objectives:

- 1) The participant will be able to recognize signs and symptoms of a child experiencing a respiratory emergency.
- 2) The participant will be able to differentiate upper from lower airway problems
- 3) The participant will understand the pathophysiology of a respiratory emergency
- 4) The participant will be able to develop a treatment plan for the patient with a respiratory emergency.

Target audience: BLS / ALS

Time requirement: 1 hour

Presented at conferences: Yes

Presentation style: Lecture / Discussion
